

Video Production a glimpse into a future direction for the GRC program

With guidance from the industry advisory committee, we are in the development stage of an Associates Degree program in media (video). The process of creating a new program takes considerable time, but we are concentrating efforts in this direction.

In the meantime, the FCC certificate in video production is available and there are several courses that deal with video :

There is a brief introduction to video in the Grc20B – Media course.

Grc22 Digital Media (audio and video work)

Grc 23 Soon to become the “video editing course” featuring Adobe Premiere

Grc 27 Digital Video Production (overall concept development through production stages)

Grc 32 Video Techniques (a cinematography course. Learn the tools, lighting, and composition)

Grc 47 Intro to 4-D Design (an analysis of the medium)

Grc 51 Storyboarding (develop the visual message)

Grc 53 Adobe After Effects (motion graphics)
